Amherst March 16th 1833

Dear Sir,

We learn Mr Adams will return from Boston through Worcester the last part of next week: and if you can send by him your list of land & fresh water shells I shall be much obliged to you: also the small box of shells that I left with you — If you will leave the package at Worthington's Hall he will find it —

You will have an opportunity of making any alterations or additions to your catalogue which you may wish for several months to come as it will not get through the press. But I should be glad of it now to embody in my report —

In inserting your name to your catalogue shall I add any title?

Respectfully your friend
E. Hitchcock

Hitchcock, geologist.
